OBJECTIVE

Results-driven and adaptable Full Stack Developer with strong expertise in Java, Spring Boot, MERN stack, and cloud-native systems. Passionate about building scalable products, learning rapidly in dynamic environments, and contributing to innovation in fintech and experience-driven platforms. Actively seeking impactful roles in product-based teams to grow as a versatile engineer through real-world development, cross-functional collaboration, and continuous delivery.

SKILLS

- **Programming Languages:** Java, Python, JavaScript, Kotlin, Swift, SQL, C++
- **Web Backend Development:** Spring Boot, Node.js, Express.js, REST APIs, JWT, MVC Architecture
- **Frontend UI Development:** React.js, HTML, CSS, Bootstrap, Tailwind CSS, Figma, Adobe XD
- **Mobile App Development:** Android Studio, Kotlin, Java (Android), Swift, Xcode (iOS), Flutter (basic)
- **Databases:** MongoDB, MySQL, PostgreSQL, MongoDB Atlas, Firebase (basic)
- **Cloud DevOps:** AWS, Docker, GitHub Actions, Red Hat OpenShift, Netlify
- **Data Science Analytics:** Pandas, NumPy, Scikit-learn, NLP (Cosine Similarity), Tableau, Power BI
- **Tools Collaboration:** Git, Postman, VS Code, JIRA, Google Colab, GitHub
- **Soft Skills:** Team Collaboration, Analytical Thinking, Time Management, Adaptability

WORK EXPERIENCE

AICTE Data Engineering Intern [\[Certificate\]](#)

Jan – Mar 2024

- Developed ETL pipelines using Python to automate structured data ingestion, transformation, and validation.
- Ensured data integrity by implementing logging and error handling for data flows.
- Worked with relational databases and queries to extract insights for internal dashboards.

Backend Developer (Freelance)

2023 – Present

- Designed and deployed scalable backend APIs with Spring Boot and Express.js.
- Built CI/CD pipelines using GitHub Actions for auto-deployment with Dockerized containers.
- Integrated secure authentication layers and logging systems to handle production use cases.

EDUCATION

Degree	Institution	Year	Grade
B.Tech CSE	K.L. University, Vijayawada	2022 – Present	9.2 / 10
Intermediate	Vidya Vikas	2020 – 2022	90%
SSC	Vidya Vikas	2019 – 2020	93%

ACADEMIC PROJECTS

AI-Powered Cyber Threat Detection [\[View Project\]](#)

Feb 2025 *Tools: Java, Spring Boot, Python, AWS, React, MongoDB*

- Built a real-time backend system to detect and alert anomalies in network traffic using ML models.
- Designed REST APIs with Spring Boot and hosted them on AWS EC2 with autoscaling features.
- Integrated MongoDB for storing live logs with async operations and fail-safe retry logic.

AI Job Recommendation System [\[View Project\]](#)

Jan 2024 *Tools: MERN Stack, NLP, JWT, MongoDB Atlas*

- Created intelligent job matching backend using resume parsing and cosine similarity.
- Implemented secure JWT-based session handling and cloud-hosted APIs for scalability.
- Refactored logic for batch operations and async calls to improve backend response time.

Movie Ticket Booking System [\[View Project\]](#)

Jul 2024 *Tools: JSP, MySQL, Java Servlets, MVC Architecture*

- Developed backend logic for seat selection, ticket booking, and payment simulation.
- Used MVC pattern for separation of concerns and hosted the app using JBoss.
- Improved DB performance via indexing, prepared statements, and load testing.

CERTIFICATIONS

- | | |
|--|-----------|
| • AWS Cloud Practitioner [View Certificate] | May 2024 |
| • Red Hat Application Developer [View Certificate] | Sep 2024 |
| • Oracle Cloud AI Professional [View Certificate] | July 2024 |

LEADERSHIP INITIATIVES

Campus Development Projects — KLU

Jun 2023 – Present

- Developed and maintained internal web tools for student use.
- Managed code versioning and handled backend issue resolution.

Open Source Contributions

March 2023 – Present

- Fixed critical bugs and improved REST error handling in community Java projects.

DECLARATION
